## **DETAILED ACTION**

### ***Response to Amendment***

1. No amendments have been made in the response submitted on March 14, 2005.

**Claims 1-14 are pending.**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6-8, 11, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayes et al. (US 4,472,479).

Hayes et al. disclose fluorescent printing ribbons, which have a reflective pigment therein (Column 1, lines 11-15). To prepare the ribbon, layer of wax or other suitable medium and fluorescent material is deposited on the ribbon base, which may be a thin film of plastic, and a reflective barrier material is added to this layer or deposited in a second layer of wax upon the first layer. The barrier pigments used are pigments of finely divided metals or materials with metallic colors which are reflective and do not shift the wavelength of the fluorescent light (Column 2, lines 1-4). The pigments are finely divided pigments of reflective material which do not shift the wavelength of fluorescent light and examples include mica platelets coated with titanium oxide. The fluorescent material is a mixture of fluorescent dyes suspended in a polyester resin

(Column 3, lines 40-55). With regards to the limitations of claims 6 and 7, the Examiner takes the position that the phrase "are produced by milling organic pigments with milling media having a particle size less than about 0.3", simply recites a process limitation and the resulting product is identical to one disclosed by Hayes et al. Furthermore, the Examiner takes the position that the ribbon taught by Hayes et al. inherently meets the limitation that said coating composition exhibits a first appearance on face dominated by absorbance of light by said colorants and a second appearance on flop dominated by fluorescence of the colorants given that the structure of the ribbon and the colorants and reflective pigments taught by Hayes et al. and the structure of the instantly claimed invention and the colorants and reflective pigments therein is identical. All limitations of claims 1, 2, 6-8, 11, 13, and 14 are disclosed in the above reference.

### ***Response to Arguments***

3. Applicant's arguments filed on March 14, 2005 regarding the rejection of claims 1, 2, 6-8, 11, 13, and 14 under 35 U.S.C. 102(b) as being anticipated by Hayes et al. (US 4,472,479) have been fully considered but they are not persuasive. Applicants traverse the above rejection and submit that the structure taught by Hayes et al. does not meet the limitation that said coating composition exhibits a first appearance on face dominated by absorbance of light by said colorants and a second appearance on flop dominated by fluorescence of the colorants. However, the Examiner has taken the position that such a limitation is met by the structure taught by Hayes et al. given that the structure of the ribbon and the colorants and reflective pigments taught by Hayes et

al. and the structure of the instantly claimed invention and the colorants and reflective pigments therein is identical.

***Allowable Subject Matter***

4. Claims 3-5, 9, 10, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
